

# LaTeX tutorial v1

Boi

18 December 2022

## 1 Introduction

Hello, this is the first document.

This is my second paragraph. As you can see, there is an unwanted 2 fingers spacing, and there is no line between the 2 different paragraphs.

As you can see, this is much better. This is how you do it. Before you end off the last paragraph, you can add a `\*`. At the start of the new paragraph, you begin with `\noindent`.

## 2 Math Equations

this is an equation:

$$y = mx + c$$

Integral  $\int_a^b x^2 dx$  inside text

$$\int_a^b x^2 dx$$

### **3 sections**

#### **3.1 subsection**

## 4 bullet point

- one
- two
- three

## 5 text changes

### 5.1 bold

ctrl b - **yes**

### 5.2 italics

ctrl i - *yes*

This text uses a different font typeface
